NormLedger™
COMPLIANCE GOVERNANCE

You built it for everyone. Can everyone access it?

INCLUSION, EVIDENCED.

Accessibility is a continuous responsibility, not a one-off scan. NormLedger helps teams show what they knew, what they decided, who owns the fix and how to demonstrate progress after every release.

A CONTINUOUS LOOP: MONITOR, EVIDENCE, GOVERN, PROVE

MONITOR

Scheduled and on-demand scans against the law you declare. Every WCAG 2.1 and 2.2 AA criterion gets a recorded outcome; people review what automation cannot decide.

EVIDENCE

Every finding and decision goes into an append-only log, chained with SHA-256 and timestamped by an independent authority (RFC 3161).

GOVERN

Failures become tasks with owners and deadlines. A verified rescan closes them; a recurrence reopens them. Overdue work escalates.

PROVE

Versioned accessibility statements, evidence pack exports anyone can verify, and read-only access for your auditors.

WHY IT MATTERS

- Clear accountability across every release
- A traceable history for customers, regulators and auditors
- Less manual evidence gathering before an audit or a procurement

BUILT FOR INTERNATIONAL ACCESSIBILITY GOVERNANCE

Available from launch across the EU, UK, US, Canada, Brazil and Norway, and applicable WCAG-based requirements in other jurisdictions. Organisations declare the laws and standards relevant to them; NormLedger structures the governance and evidence, without determining legal applicability. The European Accessibility Act is one important example, not the geographical limit.

CHOOSE HOW TO START

- FREE | A sample of the page you enter in under a minute, then a full summary of up to 200 pages by email - no account needed.
- ESSENTIAL | €99/month or €990/year · 1 site · 200 pages per scan · 3 members · 1 auditor seat.
- GOVERNANCE | €319/month or €3,190/year · Unlimited sites and members · first scan of each site up to 50,000 pages, then 5,000 per scan · evidence dossier, API and multi-organisation view.
- NON-PROFIT | Free for eligible non-profit organisations · 1 site · 2,000 pages per scan · 5 members.

WHAT AUTOMATION DOES NOT DO

Automated scans do not detect every barrier, certify compliance or determine whether the law applies. Expert audits, testing with people with disabilities and legal advice may still be needed.
